

Holmes County Vision

Through the visioning process and public input we have established that the citizens of Holmes County desire that:

Holmes County should provide a development environment sensitive to the communities independent spirit built on an agricultural base that values land ownership, has a strong value system, is aware of the area's abundant natural resources and provides opportunities for families to continue to obtain land tracts that allow sufficient space to enjoy open space. It should further seek to provide economic opportunities to allow those who live in the County to work in the County. At the same time there must be a balance that preserves agricultural and environmentally sensitive land for the productivity and enjoyment of future generations.
